THAT'S ME

Experienced frontend web developer adept at crafting visually captivating user interfaces and delivering seamless online experiences with a deep understanding of modern web technologies.

WORK EXPERIENCE

Forward Society volunteer (junior frontend developer)

18.3.2023 – 20.6.2023

I was selected for junior frontend developer role for making their youth organization website. We made it with team collaboration . I got a lot of team experiences in this project.

MMSIT workshop

31.5.2023 – 28.8.2023

I got a lot of challenges and knowledges. I made real life projects with my team such as Hotel Website, Contact Web Application (Google Contact App), Portfolio.

Freelance Job

(Sep 2023 – Jan 2024)

I worked on Music and Sport News websites, as well as a Dashboard and a Ticketing website for a music show. Since there was no dedicated designer, I took on the responsibility of designing and developing the user interface. I excelled in communicating with clients, particularly in discussions concerning design and workflow.

EDUCATION

Great Light Private High School

2016 - 2020

High School graduated.

University of Computer Studies Yangon

2020 (1st year)

During covid-19 saturation, I dropped out college and I've studying for my passionate career job.

MMSIT (Special Web Design Course)

18.10.2022 – 31.5.2023

I learned and practiced more about Html, CSS and JavaScript. I also attained an advanced level in React and Tailwind Css.

PROJECT I MADE

- **Moviezine** (<https://movie-zine.vercel.app/>)
This project is one of my favourite because I created my own design layout, responsive and using **framer motion** for animation.
- **Seafood Paradise** (<https://seafood-paradise.vercel.app/>)
This project is from the class practice section. I made this between one week.
- **Burma Recipe** (<https://shorturl.at/eBKNU>)
I don't have playstore acc yet so I linked to my linkedin. This project is my first **react native** with **expo** project. I used data from **Burma project idea** and made with **Tamagui**.
